SUPREM light

SUPREM FORMEN

Small-shaped pads

The SUPREMLight is a range of products for managing light to moderate incontinence. They are designed for the small urinary losses caused by bladder weaknesses. This range of products provides anti-leakage security, discretion and comfort and can be worn with GANMILL *Fix* mesh pants, GANMILL *Panty* or regular underwear.

SUPREM FORMEN has been specifically developed to meet the need of male users.

SUPREMLight Mini, Normal, Extra and SUPREM FORMEN Extra are packed individually for more discretion.

Product advantages

100% breathable

Breathable back sheet that enables the air to flow to maximise skin integrity.

Odour control

New generation Super absorbent Polymer : maximizes the absorbency level and neutralises odours.

More discreet

Anatomic shape for a better fit and more comfort, whilst remaining discreet.

No humidity

The acquisition layer improves the rate of absorption, greatly reducing the risk of leakage and any potential feeling of wetness.

No leakage

A peel off strip helps to keep the pad in place, greatly reducing the risk of leakage.

Hypoallergenic

The SUPREM range has been tested under dermatological conditions with the results proving the pads to be hypoallergenic.

More absorbency

The Super absorbent Polymer provides a faster absorption and helps to keep the user dryer, longer.

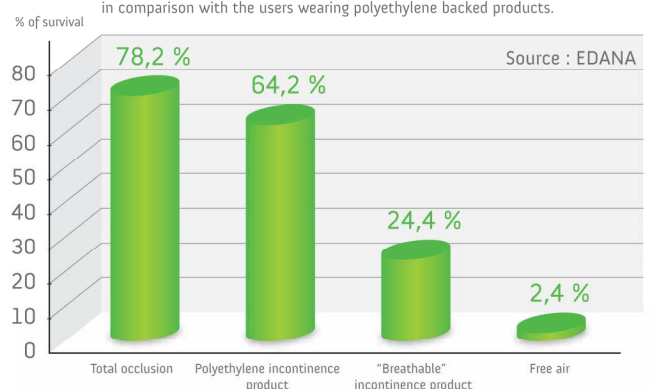

Easy identification

Colour code / Absorption level

Survival of the Candida Albicans on human skin under incontinence management (Source: EDANA)

This study shows that the number of infections by Candida Albicans has been reduced by 50% among the users wearing breathable backed products in comparison with the users wearing polyethylene backed products.
